INCIDENT Weather Forecast

FORECAST NO:

NAME OF FIRE: Loma

PREDICTION FOR: Day/Night SHIFT

UNIT: IMET - Bob Nester

SHIFT DATE:

Oct 2, 2016

SIGNED:

Incident Meteorologist

TIME AND DATE

FORECAST ISSUED:

2100 Oct 1, 2016

WEATHER DISCUSSION: A weather disturbance in this cool northwesterly flow will impact the Loma fire with continued breezy northwest winds on ridges. In addition, the increased instability and moisture may produce a few showers this afternoon and even. There is a slight potential for a lightning strike or two north of the Loma fire. If a shower occurs rainfall amounts of less than .05" are expected.

TEMPERATURES: Max: 58-64

Min: 42-46

Min HUMIDITY:

35-45% during the day

70-80% evening and overnight

20 FT WINDS:

Northwest to north 7-14 mph with gusts to 20 mph on ridges and north to south aligned

drainages in the afternoon.

Northwest to north 3-7 mph after 1800.

MARINE LAYER:

1000 feet or less

EXTENDED FORECAST Monday: Yet another weather disturbance will move through the region Monday afternoon. Confidence is increasing for scattered showers across the central coastal mountains. It will remain pretty cool with temperatures struggling to reach the mid 60s and RH values continuing to be moderate in the 35-45% range for minimums.

Tuesday through Friday The trough of low pressure responsible for the northerly winds and scattered showers will have moved east allowing for a return to dry and warmer weather with light southwesterly winds. Expect a slight increase in the marine layer each day.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 005	TYPE OF FIRE: Wildfire
FIRE NAME: Loma Fire	OPERATIONAL PERIOD: 10/02/2016 0700-0700
DATE ISSUED: 10/01/16	TIME ISSUED: 1900
UNIT: CA-SCU-006912	SIGNED: Marshall Turbeville
	Typed/printed: Marshall Turbeville (FBAN)

INPUTS

WEATHER SUMMARY:

A weather disturbance in this cool northwesterly flow will impact the fire with continued breezy northwest winds on ridges. In addition, the increased instability and moisture may produce a few showers this afternoon and evening. There is a slight potential for a lightning strike or two north of the fire. If a shower occurs rainfall amounts of less than .05" are expected.

TEMPERATURES: Max: 58-64

Min: 42-46

MIN HUMIDITY: 35-45% during the day

70-80% evening and overnight

20 FT WINDS: Northwest to north 7-14 mph with gusts to 20 mph on ridges and north to south aligned drainages in the afternoon. Northwest to north 3-7 mph after 1800.

OUTPUTS

GENERAL:

Weather conditions have moderated fire behavior allowing for containment and mop-up. Underlying drought stressed fuel conditions still exist with steep topography. The potential for torching trees has decreased but is still a possibility where jackpots and stumps continue to burn. Spotting is a possibility from torching trees or rollout from fire weakened trees where receptive fuel beds exist outside of control lines during dry and warm portions of the shift. Larger dead and down fuels will continue to smolder. Energy Release Components (ERC), along with 100-hour and 1000-hour fuel moistures have returned to near normal for lower elevations and remain between the 90th and 97th percentile for higher elevations. Conditions will be favorable for mop-up.

FDFM: 6% (afternoon)

LAL: 1

SPECIFIC:

Division E: Handline in steep terrain in timber litter fuels with unburned forest canopy. Potential for rollout.

Division G: Ridgetop road and dozer line exposed to wind with islands and pockets below line.

Division M/N: Ridgetop line with varied elevation and fuel types.

Division P: Ridgetop line below 1,800 feet in grass and oak woodland. Potential for rollout below slopovers with underslung line.

Division Q: Bottom of canyon. Cooler and moister conditions than higher elevations of fire. Islands and areas of residual burning.

Division R: Varied elevation, fuel types, and fuel consumed by the fire. Fire has burned near bases and through the timber litter of large trees including Coastal redwoods. Islands and areas of residual burning.

Division S: Line on south aspect in timber litter fuels with unburned forest canopy. Islands and areas of residual burning. Potential for rollout.

Fire behavior for islands, spot fires and new starts during driest and warmest conditions burning upslope with wind and slope in alignment. (Worst case scenario)

Fuel Type	Flame Lengths (feet)	Rate of Spread (feet/min)
Grass/Brush	5 - 10 (Head) 2 - 4 (Flanking)	Up to 30 (head)
Timber Litter	1 – 3 (Head) Less than 1 (Flanking)	Up to 3 (head)

Probability of Ignition: 54% in afternoon and early evening, lower during remainder of shift

Spotting Distances: Up to 0.4 miles

AIR OPERATIONS:

Partly cloudy by mid to late morning then cloudy.

Sunrise: 0703 Sunset: 1851

SAFETY

- Be aware of stumpholes, fire weakened trees, and areas where torching and rollout can occur.

LOMA HEALTH AND SAFETY MESSAGE

We Are ALL accountable for SAFE behaviors

INCIDENT: Loma Fire CA-SCU-006912 DATE: October 2, 2016
TIME: 0700-0700

Situational Awareness at All Times!

When It comes to Safety, The only thing worse than being oblivious to the unknown is ignoring the obvious....

Hazard trees: Survey your work areas for hazard trees, flag and restrict access, use only qualified personnel for tree felling. Review and follow Hazard Tree Safety, pg. 22-23 in your IRPG.

Steep slopes/rolling material: Watch your footing while hiking in steep terrain. Be careful of loose rolling debris. Maintain Situational Awareness.

Personnel: Manage yourself and those around you for fatigue. Drink fluids frequently and eat nutritious food regularly. As fatigue increases, injuries tend to increase also. Keep an eye on your crew and partner. Stay engaged and make smart decisions.

Driving: Slow Down! Drive defensively. Expect the unexpected around every curve. Drive with headlights and seatbelts on. There are narrow roads with limited passing room. Coordinate your movements on one-lane roads. Use warning devices when operating near traffic.

Complacency: All PPE must be worn, including shrouds, when working on the fire line. Mop up requires your situational awareness even without active fire. Unburned fuels can reignite suddenly and turn against you.

Mop Up: Conduct a thorough briefing for all personnel. Use all PPE, including eye protection. Maintain proper spacing. Be alert for stump holes. Evaluate unburned islands and stay alert.

Review your ICS 206 and know what to do in the event of a medical emergency.

Lookouts, Communication, Escape routes, Safety zones

Fire Suppression Repair

Stay alert working around heavy equipment:

- Utilize communication with heavy equipment operators (radio or hand signals).
- Monitor safe working distances
- Avoid working below dozers, watch for rolling material.
- Maintain accountability of personnel

Backhaul in Progress:

- Use proper lifting techniques,
- Be aware of stump holes
- Watch out for trip hazards and loose footing.

Incident Safety Officer: Chad Thompson SOF(T)

Incident Commander: Sean Kavanaugh

6

LOMA INCIDENT RISK ANALYSIS (ICS 215a)

DIV	HAZARDOUS ACTIONS/CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES						
ALL	DRIVING HAZARDS	Slow Down! Drive defensively! Expect the unexpected around every curve. Drive with headlights and seatbelts on. Narrow roads with limited passing room. Coordinate your movements on one-lane roads. Use warning devices when operating near traffic.						
ALL	FATIGUE/COMPLACENCY	Be alert for signs of fatigue and take breaks as necessary. Monitor incoming resources for level of fatigue. Drink water before, during and after shifts, up to 1.5 gal. each shift. Be alert for signs of heat stress in yourself and others; use the buddy system. Eat small meals often and when possible.						
ALL	STEEP TERRAIN / ROLLING DEBRIS	Watch your footing while hiking in steep terrain. Be careful of loose rolling debris. Maintain Situational Awareness.						
ALL	LL HAZARD TREES Identify and isolate the area to provide for the safety of others. Flag and make proper notifications. Do Not Fall trees out of your certification level.							
ALL	MOP UP	Conduct thorough briefing for all personnel (inside rear cover IRPG). Use all required PPE, including eye protection. Maintain proper spacing and overhead clearance. Be alert for stump holes and root cavities. Minimize exposure to smoke, and rotate personnel into clean as practical. Evaluate unburned islands/Increase situational awareness.						
ALL	FIRE SUPPRESSION REPAIR	Stay alert working around heavy equipment working in the area. Monitor safe working distances. Utilize communication with heavy equipment operators (radio or hand signals). Maintain accountability of personnel at all times. Avoid working below dozers, watch for rolling material.						
ALL	BACKHAUL	Use proper lifting techniques. Be aware of stump holes. Watch out for trip hazards and loose footing.						
ALL	POWER LINES	Follow <i>Power Line Safety</i> guidelines (IRPG pg.24.) Communicate power line hazards to supervisor and hazard flag accordingly. Flag area around downed power lines and deny access. Treat all downed power lines as energized.						
ALL	PERFORM TAIL GATE SAFETY MEETINGS	Everyone should be briefed on the conditions and circumstances. regarding the fire and their assignments per the IRPG. Ensure all personnel have PPE, food, and water.

FIRE SUPPRESSION REPAIR

LOMA INCIDENT CA SCU-006912

Fire Suppression Repair is the repair of damage caused directly from fire suppression activities, it is not the repair of areas damaged by the fire. We cannot upgrade facilities beyond their pre-fire condition.

Start Early!

Repair work should start as soon as practical. However, repair activities shall not hamper or conflict with fire suppression actions. When possible, construct waterbars on dozer lines, hand lines, and safety zones concurrent with line construction or mop-up operations. Scattered trash shall be collected and deposited at Drop Points. Police your areas.

Repair Site Inventory:

Report Fire Suppression Repair needs as soon as possible. The Suppression Repair Group will evaluate each site, develop a specific repair plan, and schedule an appropriate repair with necessary resources.

Infrastructure Damage:

Report the location and type of suppression damage to infrastructure. Common examples include:

- Fences /gates
- Culvert/ Bridge/ Other watercourse crossings
- Water sources
- Utility distribution line; above/below ground.
- Restore barriers on roads previously closed but opened for suppression activities.
- Remove trash and debris, including flagging and signs when no longer needed.
- Misc. damage to residential property.

Natural Resource Damage:

This category represents repairing problems <u>caused</u> by <u>fire suppression activities</u> (direct effect) and to prevent likely future problems such as accelerated erosion caused by winter rains (indirect effect).

- Construct drivable waterbars or rolling dips on unsurfaced roads.
- Construct waterbars on all dozer and hand lines according to the following Specifications: Water bars shall be cut diagonally into firm soil at least 6" deep and have a berm at least 12" in height. Water bar should have a 30-45 degree angle to the fall line. Outlets must be open and directed onto the least erodible material possible.

Line or Road Gradient (%)	0-10%	11-25%	26-50%	>50%
Waterbreak Spacing	100'	100'	75'	50°

- Remove (or breach) all berms created by suppression activities unless necessary to divert runoff from a sensitive site.
- Remove soil and debris from culverts and drainage facilities deposited by fire suppression activities.
- All slash, soil, and debris deposited into watercourses shall be removed and stabilized as feasible.
- All work within 100 feet of a watercourse, cultural site or other sensitive location shall be performed by hand crews to avoid further damage and with guidance from the FSR Group.

Cultural Site Damage:

Immediately report any known or suspected archaeological/historical site through chain of command to the incident Archaeologist and/or the Fireline Suppression Repair Group. This includes air tanker drops upon a site. Use least disturbing suppression methods possible unless life safety is at risk. Flag site perimeter for identification. Removing or disturbing any artifact is not permissible.

Comp Claims Issues:

Damaged resources that are too large or complex for the Fireline Suppression Group to handle shall be turned over to Comp Claims for processing. Examples of such issues include damage to pavement, bridges, pipelines, etc.

DEMOBILIZATION PLAN Loma Fire CA-SCU-006912

DEMOB PROCEDURES

- CHECK THE DEMOB LIST EACH MORNING. YOU CAN FIND THE DEMOB LIST THROUGH THE "QR" CODE ON THE I.A.P. COVER OR ON LISTS POSTED THROUGHOUT CAMP. ONLY REPORT TO DEMOB AT YOUR SCHEDULED TIME. EARLY ADMITTANCE WILL NOT BE ALLOWED.
- PICKUP A DEMOB CHECKOUT FORM (ICS-221) FROM THE DEMOB UNIT, THEN GO TO THE FOLLOWING UNITS TO OBTAIN THE NECESSARY SIGNATURES:
 - ✓ SUPPLY UNIT
 - ✓ COMMUNICATIONS UNIT
 - ✓ GROUND SUPPORT/VEHICLE INSPECTION***
 - ✓ DOCUMENTATION UNIT
 - ✓ TIME UNIT
 - ✓ TRAINING UNIT (IF APPLICABLE)
 - ✓ ACCOMMODATIONS (IF APPLICABLE)

***VEHICLE INSPECTION:

- O THE DEMOB UNIT WILL INFORM YOU IF THE VEHICLE NEEDS TO BE INSPECTED.
- O YOU MUST HAVE THE ICS-221 DEMOB FORM WITH YOU AT VEHICLE INSPECTION.
- A Vehicle Inspection time will be provided when you initially arrive to the Demobilization unit.
- DO NOT REPORT FOR VEHICLE INSPECTION PRIOR TO YOUR APPOINTMENT

RETURN THE COMPLETED ICS-221 FORM TO THE DEMOB UNIT AND TRAVEL HOME SAFE!

TRAINING SPECIALIST MESSAGE

All Loma Incident Trainees must "closed out" with the TNSP by 1200 Hrs on Monday, October 3rd.

In order to receive documented credit for your training assignment – you must close out with the Training Specialist before you Demob!!

BEAT THE RUSH!

If as much work as possible has been completed in the position task book, Trainees may close their assignment with the TNSP prior to the demob process.

Bring the following to the "exit interview"

- <u>A completed and signed ICS 225 or 226</u> <u>Performance Evaluation</u>
 - A completed Exit Interview Form

Forms are available at the Training Office

Remember: No documentation - it didn't happen!

CAL FIRE INCIDENT MANAGEMENT TEAM WATER USAGE PLAN

California Drought Emergency

The following shall be considered and implemented by all fire resources as a means to provide maximum efficiencies when utilizing water resources, while minimizing the impacts to private and public water supplies. Accountability shall be maintained for all water supplies that are utilized and care should be applied to ensure proper replacement and/or reimbursement to the supplier/owner.

Fireline personnel- (During mop up operations)

- Use Pencil Hose and Garden Nozzles with Shut-Offs.
- Use Back pumps.
- Use Dry Mop-up and consolidation of heavy fuels to areas where they can burn out safely.
- Locate/Relocate Firelines to lighter fuels or natural barriers when safe.
- Set up and use portable tanks in anticipation of longer transport times for Water Tenders.
- Use of foams, gels and other water enhancers.
- Evaluate need to mop up in excess of 200 feet from fireline.

Road Maintenance and Repair-

- Monitor and water roads only when and where needed.
- Water when most effective (evening and nights).
- Use chemical treatments when available (Magchloride, Omni bind etc.).
- Consider use of tertiary or treated water.

Aviation Operations-

- Consider use of Gels, Foams and Retardants. Set up portable plants.
- · Consider using Blivits and Pencil Hose for interior mop up operations as opposed to numerous bucket drops.
- Establish and use pre-use agreements for existing and known water sources.
- Use large watershed dip sites when able. Minimize use of small, static ponds and lakes.
- Maintain accountability of water used and locations of dip sites.
- Evaluate need for interior bucket drops.

Private Water Supplies-

- Notify property owner as early as possible.
- Minimize usage and develop alternative water supplies when and where appropriate.
- Track usage (meter, ICS-214, Water Usage Reports) and develop a plan to replace water.
- Make arrangements for reimbursement and damage claims if needed.

Public/Municipal Water Supplies-

- Notify Agency as soon as possible and request a representative to the incident.
- Identify fill areas and request metering devices. Note locations on incident map.
- Use alternative or reclaimed water sources when available. Note locations on incident map.
- Make arrangements for reimbursement and damage claims if needed.

Management and Supervision-.

- Consider complexity of water use on incidents. Establish a Water Supply Group Supervisor to coordinate additional resources to support the incident needs.
- Complete the Water Usage Report daily and turn in to Finance.
- Review this check list and brief daily.

Update

Complete Information Update Sheet here

MEDIA – The California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specified within the code. However, this does not include crime scenes, private property and does not imply that the news media may interfere with incident operations while they are in the areas of concern. More information can be found here.

409.5

CAL FIRE SOCIAL MEDIA POLICY – When assigned to a CAL FIRE incident, you will adhere to the CAL FIRE Social Media Policy, Section 0691. You can find further information about the CAL FIRE Social Media Policy <u>here</u>.

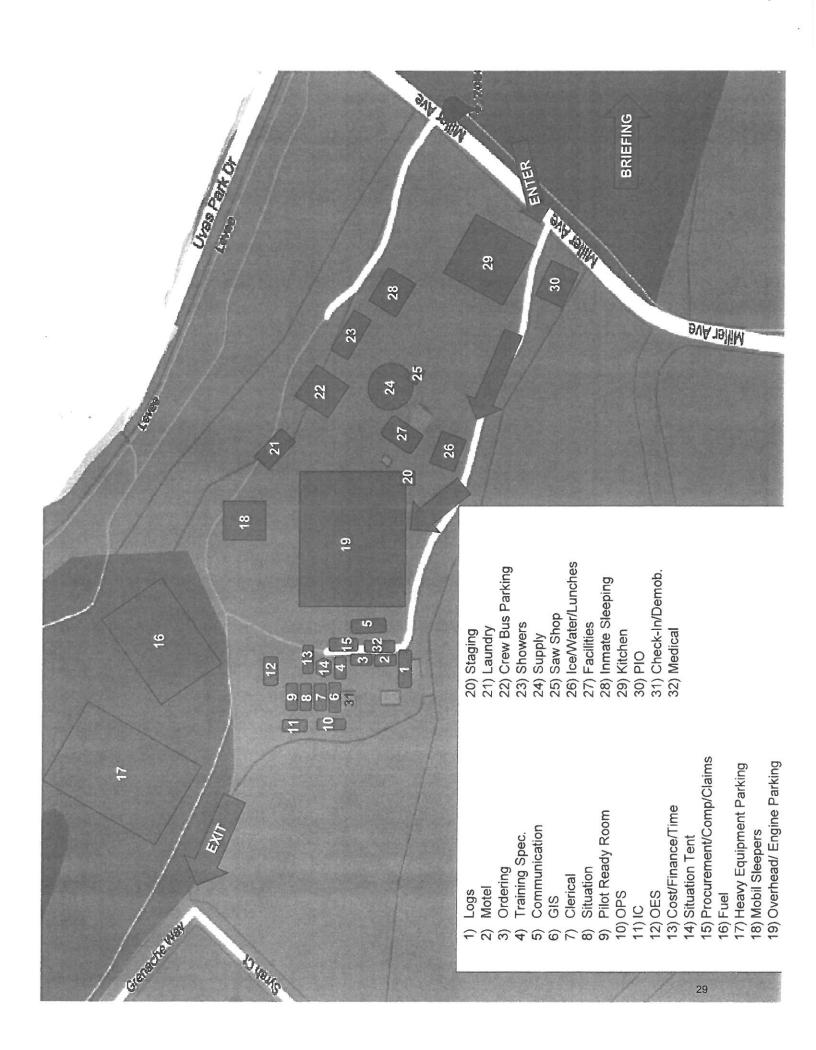

Social Media

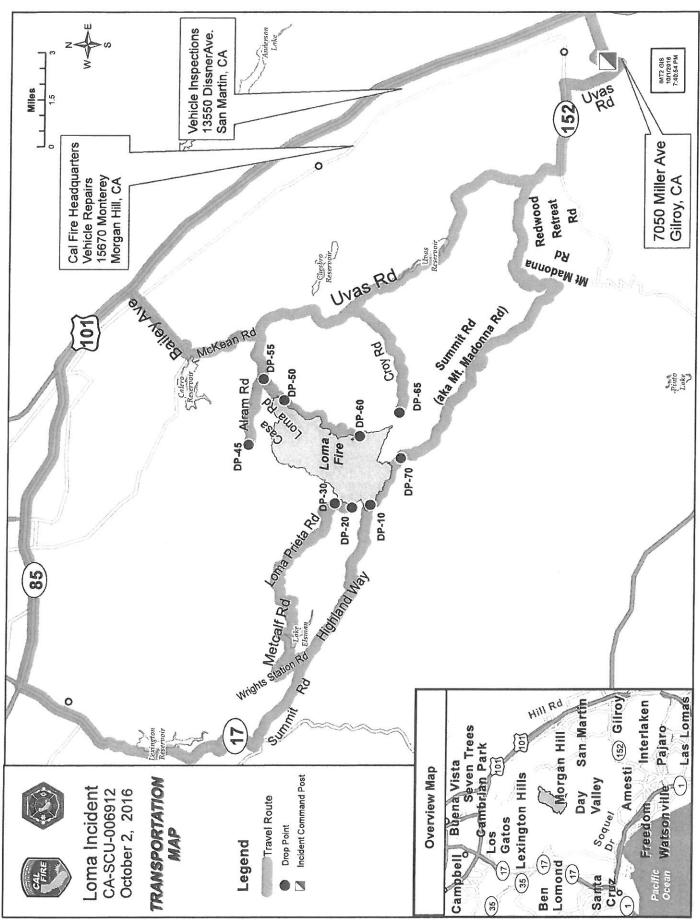

PHOTOGRAPHS AND VIDEOS OF INCIDENT – We are in a new era of media. Media no longer means news/broadcast industry, but now refers to anyone that has the capability to shoot video, photographs and post them onto social media sites in a matter of minutes. Unfortunately, we have seen some instances of photographs or videos that have depicted unsafe, unprofessional or embarrassing circumstances which are a serious breach of ethics. When this happens, it reflects poorly on all that are attached to this incident. Posting an inappropriate video, photo or blog comment could expose oneself to unwanted ramifications. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera loses their situational awareness.

The Public Information Office would like copies of the video and pictures that you safely took while not in an emergency situation, fire suppression activity or in an overhead assignment. Bring your video and pictures to the Public Information trailer; they will be reviewed and possibly uploaded to our many CAL FIRE social media sites. Remember, we don't want photographs or videos that depict unsafe, unprofessional or embarrassing circumstances, which are a serious breach of ethics.

LOST AND FOUND – The Information Section will manage lost and found items for the incident. If you have lost an item please leave your contact information and what you have lost at the Information Section. If you have found an item on the incident, bring the item to the Information Section with your contact information as well.

MAIL SERVICE - The Information Section can assist you with sending and receiving mail.
